

PROJECT

I am the short hair girl

Health Wheelchair From The Waste Material

Due to the present age or patient with difficulty in moving the body, it is often recommended by doctors to use a wheel Chair, but it is priced at a high price. I have the idea of reconditioning the broken wheelchair to reduce the cost and add function by It can measure pressure and heart rate from second hand phone. This activity provides me about working effectively under time pressure and learn how to work with team.
